---> Americans serve no purpose, they are poorly educated, fat, stupid, arrogant and ignorant. Hospitals would be better served and more efficient if they kept more guns around and filled the morgue and the dumpster in the alley with dead fucking Americans. When an American gets sick, they should be shot through the head or have their belly's blown out with a 12 guage. Americans are only good for stopping bullets and target practice anyway. As animal byproducts, they're of low quality so the bodies could be piled up and burned every Sunday night.

American's are shit, no sense in keeping them around if they get sick. They shoot animals when they get sick, why not Americans?

Americans never bathe or wipe their asses, they stink of shit.
