.... Weird Nursing Tales

is back!

Since the Dawn of Time..

Or at least since the days Florence Nightingale helped the soldiers of the Crimean War and Dorothea Dix aided the wounded during the War between the States, nurses have long tried to ease the suffering and pain of the sick and wounded. Yet, despite all this, there still lurks a part of medicine which many outside the profession would not care to see or hear about. Stories of murder, of death, of ignorance, of sex (or something resembling sex), and stories which only a medically trained professional could understand and laugh about!

This is Weird Nursing Tales

I cannot vouch for the validity of every story gathered here, but I can for those I personally experienced: "You Only Live Twice", "Nurse Nightmare", "The Demon Patient", "The Devil's Door" as well as a small number of anecdotes scattered throughout WNT . As for the others? Well, lets just say you gonna have to trust me, in much the same way I trust the authors. Enjoy! "
