Hi all,

My wife needs to choose a doctor of Obstetrics/Gynecology from a list for her regular pregnancy check up. We want to choose a doctor whose office is nearest of my house. However I see her certificate is "Board Eligible in Obstetrics/Gynecology" while the certificates of the other doctors in the list are American Board of Obstetrics/Gynecology.

Can you please tell me the difference between two types of certificates? Which one is better?

Thank you.

.
