The fact that you think you're right and various others are wrong about MCS doesn't make Hulda Clark an authority about anything.

Clumsy try at changing the subject, David; but nobody, except for the circle-jerk that is the medical-establishment, cares who's an 'authority'.

Clumsy try at changing the subject.

Not at all. The subject remains that Stephen Barrett, M.D., is absurd and bizarre in decrying Hulda Clark's beliefs.

[Southeast Asia is] where [Fasciolopsis buski] lives.

Why do you believe that?

.
