- 

Hi all,

I am interested in working in the area of Biomems for my master's research. Could any one tell me the possible problems and areas, that I can look at?

I just want to know the standards, and possible cases.  
What are the software packages that are useful for doing research in Biomems? Are there any freewares?

Any help in this regard is appreciated.

Thank you in advance.

regards  
Uday
