While we are on the subject, there doesn't seem to have been much discussion of:

[http://www.geniebusters.org/00\\_contents.htm](http://www.geniebusters.org/00_contents.htm)

....here since 2001.

IMO, quite a lot of this site is incorrect, but it does say some useful things, including asking how much Drexler-style molecular manufacturing using assemblers is actually going to cost.

Assemblers today are about here:

<http://www.georgehart.com/rp/rp.html>

Not exactly a meat machine yet.
