I was asked how are my Volume–Price charts different than the Price by Volume histogram.

Here is the description of the Price by Volume histogram:
http://stockcharts.com/education/IndicatorAnalysis/indic_PBV.htm

Here is the link to the Volume–Price chart:
<http://home.att.net/~geoffrey.slinker/maverick/VolumeBars.html>

In short they differ in the fact that my Volume–Price chart shows the volume for the bar (5 minute interval, 10 minute interval, whatever your bar duration is).

Geoff
