Hi guys,

The password for KDP-2, version 3.0 is

phoshourous

This includes the .EXE as well as full source code using CVF Fortran and Winteracter to compile and link. Anyone brave enough to enter the source code is welcome to it.

Vesion 4.0 will be for sale Jan 1, 2007 if I am still on the same plane of existence.

You know, back pain can really be a bitch. I gueuss I got mine.

Been in poor health. This is not a BS marketing schene. Sorry I pissed off the folks I pissed off.

Ken,

You really did a good job. I guess you won. I just did not tink there was someone smarter than I was. My real problem was not admitting it.

Jim Klein
