Why don't you simply tell me? This is just a short question;  
is it not possible to answer it also short?

> *You ask good questions, but you ask more than I have*

Well, you make bold claims. So you should expect a lot of questioning.

> *In general, though,*

And in particular?

> *the fundamental observations are its quantum structure,*

Whatt do you mean with "quantum structure"?

> *the Gforce that drives it, and the dark matter that feeds*

Why are these three the "fundamental observations"?

None of these three is even an observation. All three are  
properties or contents of the universe.
