[Hammond]

"In reality" the Universe is older than 40,000 years, but HUMAN REALITY IS NOT.

Since the Universe is 15-billion years old

"within Reality".... we see that it was nevertheless "Created 40,000 years ago"

when "reality" was created. To say "It existed" 15 billion years ago...

"tacitly assumes" the existence of a "hypothetical human observer". But in fact.... that assumption is FALSE.
