please.

[Hammond]

Absolutely no friggin problem:

Time to wake up Bernie. The BGD *IS* the "difference between the two curves for ADULTS".

It is NOT the difference between the two curves for CHILDREN. Here, I've drawn a special picture for you to clear up your error:

http://geocities.com/scientific_proof_of_god/img222.gif

NOTICE that the "BGD" clearly DECREASES as one grows up for the first 18 years of life, THEN it remains CONSTANT (15%) for the rest of your life.

<snip Shornak's amateur complaints about being caught in another mistake>
