[Hammond]

what the hell are you talking about? A satellite t.v. transponder is  
"orbiting" the Earth... doesn't matter if it is in a "stationary orbit"..  
it is still 'orbiting the Earth every 24 hours". QED... since the  
average moron gets satellite t.v. he knows it's possible to  
"orbit the Earth" and obviously a t.v. satellite could easily video  
tape the earth and transmit a t.v. picture of the "ROUND EARTH"

to us... thus proving the "flat Earth" claim is nonsense.

Fact is we have PLENTY of manned satellite vieos of the Earth... all of them showing that it is ROUND.

[Hammond]

I'm beginning to think you're a moron.
