do you ever agree with me on anything ? (:–)

i guess that once you agree you don't bother to write

the main pleasure of people here is to disagree

in our place it is called 'farginen'

ie to give credit to someone and be happy with his success

stargely enough you will never find a parallel word

(just one word) in English !!!

another to think about

i am afraid i didn't get you

sci.physics.relativity: Re: Loop quantum gravity – loop quantum electrodynamics

who is to learn a lesson??
do you mean that once i confront difficulties
in transferring my findings i should give up doing it ??
or do you mean that once people do not get me it means i am wrong??
