One derivation of the relativistic deflection of light is given on
this web page: <http://www.mathpages.com/rr/s6-03/6-03.htm>

Are you saying this derivation (not to mention all the others that
arrive at the same result) is mathematically incorrect?

>GR's prediction of Mercury's orbital anomaly is totally bogus. If you are

A derivation of the relativistic precession of Mercury's orbit is
given on this web page <http://www.mathpages.com/rr/s6-02/6-02.htm>
Again, are you saying this is mathematically incorrect?
