| Simply remember that water pressure squirts the back half of a fish  
| forward just the same as it squirts the front half backward. It is  
the  
| turbulence that works up its appetite. :o)  
|

You may have climbed so far up the tree of knowledge that you can only see the flying fish, you perhaps need to read the roots like us moles. Pressure "a state of difference in time\space" as written by somebody, I can remember who at the moment (:{) brings us to the question "what is time and what is space". Do you like my moustache ?

Sig zoro
