So you figure government workers who pump degrees for bucks are the final arbiters of qualifications?

You might consider a career in toilet paper production.

Thank god for capitalism!

Let's fire Faraday, he has Gr 8, and hire a crippled black lady with Gr. 9, that certainly will improve the bottom line as we qualify for triple Fed grant's, (minority, disabled, girl).

the kooky canucks do that all the time.

Did you see Baez's post?
