Einstein discovered that an attraction between masses is a wrong idea. It

is

a significant discovery. Falling objects are in free fall because of the curvature of space. Then he made mistakes in trying to explain that.

Henry Haapalainen

Yet for all your idiotic posting, you have not once proven that general relativity is not an accurate model of reality.

I asked this of you months ago and you simply refused. (EG)

Obviously you can't understand it, but here it is once again:
