| Piddlephuck and PD are definitely slightly less dumb than geese...but dda
| clearly has an IQ approaching zero. Maybe he is Varney's ghost.

I didn't bother reading dda after his first post. Shithead Happy Henry
confuses acceleration with push, so he claims acceleration isn't real
in free fall. I've tried to tell the cunt acceleration is dv/dt , but the
moron
is so fucked up he ignores it.
