An open letter to Dr

Part I

In previous many posts on
Special Relativity Forum
you introduced
yourself as Dr Alexander
Inpain who working at
CERN and running Nuclear
Reactors.

Also your reply showed that
you are an administrators
and post my
replies on the Notice Boards
of the CERN.

So I gave lot of weightage
to yours comments, which
were absolutely
unscientific.

So , I could not assess how a
person with SUCH POOR
KNOWLEDGE can be at
CERN?

It became clear when I
inquired from CERN
regarding it.

So you CHEATED
scientific community on the
WHOLE. It is matter of
shame.

ON 28 Sep I got letter from
Head Physics Dept., Dr
Jean-Jacques
Blaising (pasted below).

<Jean-Jacques.Blaising@xxxxxxx>

Dear Mrs Sharma,
Mr Inpain is not a member
of the the CERN personnel
and is not
registered at CERN as a
scientific associate.
Regards,
Jean-Jacques Blaising

That you are not associated
with CERN with any
capacity.
So you are a liar WHO
WILL BELIEVE YOU.
You have cheated the
scientific community.

You don t deserve the reply

But it was not put. How can
you believe a person who
cannot put his

So EVERYTHING IS

you can give importance to

Part III

MY WORK IS
ABSOLUTELY
CORRECT, FLAWLESS.

Author/Editors/Publishers/Referees

is all correct

Still there ANYONE is
welcome to contradict the
work in Physics Essays
giving the facts e.g.

What is Einstein s Sep
1905 paper ?

What are conditions under
which it is derived?

Under what conditions
experimentally it holds
good?

How to generalize it under
all conditions?

What is Ajay Sharma s
Interpretation?

How Ajay Sharma s apper
is different from Einstein s
Sep 1905

paper

How Ajay Sharma s
interpretation is incorrect (if
it)?

What are the correct
interpretations?

I HAVE ANSWERS TO
ALL QUESTIONS.

If Editor Physics Essays and
his Editorial Board finds
your

interpretation and published
the paper it is OK.

There are thousands of link
to my work on the internet.

All the
references are given below
for the purpose.

It is really shameful and misuse of the internet discussion.

If one can claim on the internet that he is at CERN number of times.

Then ensure that his name is exactly Dr Alexander Inpain.

Her also you were involved with

rambus2005@xxxxxxxx

to tell his name in 100s post but he did not.

Instead rambus2005@xxxxxxxx

put a note without name and address

criticizing your work.

Any NOTE without name and addressee itself DEFEAT.

You even changed him to contradict you paper in internal journal

Physics Essays (abstracted in current

contents) in which originally

your paper was published.

These are obvious sdeductions.

Even at the end he disappeared from the

scene he did not disclose the

name and even pointed out he is Dr

Alexander Inpain.

Anyhow it is really shameful. Just possible

they are not happy with

your work

for personal reasons.

Just possible they have written a book on similar topic . So it may be

part of professional rivalry.

Any how come what science must go on.

Such things were in past , are

now and will remain in future.

It is loss of science and its progress.
