Please do NOT become crazy...

+++++

Thank you for taking the time to write us. If you have questions or feedback about Google Groups, please visit our Help Center, which will provide you with quicker answers to your questions. The Google Groups Help

Center is located at <http://groups.google.com/support>. After searching and

browsing the Help Center, if you'd still like to contact us, please click

on the contact link at the bottom of the Help Center, select the topic that best describes your question, and send us a message.

If you'd like to remove your own posts, we're pleased to announce that we

now offer a quick and easy way to remove your Google Groups and Google Groups Beta posts. To remove your posts, please go to http://groups.google.com/groups/msgs_remove

Follow the directions to submit the following information. If you've already collected this information for a previous request, just cut and

paste it into the fields.

1. The email address originally used to post the messages.
2. The complete Google Groups Beta URL (or message ID) for each

Re: Michelson–Morley: Much ado about nil

individual

message you'd like to have suppressed.

3. A statement that says "I swear under penalty of civil or criminal laws

that I am the person who posted each of the foregoing messages or am authorized to request removal by the person who posted those messages."

4. Your current email address.

5. Your full contact information, including your legal name.

6. Your reason for requesting removal.

Please note that you can only remove posts from one email address at a time. This means if you made six posts from yourn...@xxxxxxxxxxxx and seven

from yourothern...@xxxxxxxxxxxx that you want to remove, you'll need to submit two requests, one for each email address.

We will review your request and process the removal on your behalf if we

find the information to be accurate. If you have any problems with the new

tool or if you have additional questions about removals, please let us know by submitting your question through the Help Center contact form at

<http://groups.google.com/support/bin/request.py>

Regards,

The Google Team

Please note that the Contract on the Use of google group is valid ONLY for

Re: Michelson–Morley: Much ado about nil

Re: Michelson–Morley: Much ado about nil

the google group Internet communications. It is NOT valid for the personal e–messages.

Yours Sincerely,
Valeri Dvoeglazov

Has anyone read this paper?

http://www.ptep-online.com/index_files/2006/PP-06-10.PDF

It claims that the Michelson–Morley experiment doesn't really prove that there is no absolute continuum. Any comments about it? It seems to me to be very surprising. His argument is not very complicated; I'd like to hear the opinions of the experts on this.

Thank you,
Craig

1. Published in "Regress in Physics"?
- +
2. "Doppler Effect" when the source and the receiver move at the same exact speed?

= In the garbage bin it goes
