google  
search.  
He  
posted  
from  
where  
he's  
currently  
attending  
a  
symposium.  
His  
name  
is  
on  
the  
list  
of  
attendees:

a

there's

Did you look at his papers, they are pure shit, it is amazing  
he got  
them published even in Galilean Electrodynamics.

I started at the end of course :-)

Dirk Vdm

He was pretty normal indeed until the age of 68 when daementia set in.  
Then, he discovered relativity.

Re: Jan Verheul – cretin

With his engineering education the unease must have been lurking but slumbering during his entire career – but pretty harmless. It wasn't until he got retired that he started to put some time in it. But by then it was probably too late – alas :-(
