...

You can't *see* a fast
aeroplane propeller. Will
you walk into one to
demonstrate no force is
acting on it?

Do you ever post on topic?

He does on occasion, but his knowledge of physics is on par
with his
ability to post on-topic links.

Dave at least maintains some civility. He doesn't claim to be a
professional so you've no right to judge him on that scale.

I was talking about you.

Oh... I forgot that you apply imaginary operators to pronouns

Re: "Is There a Force of Gravity?"

Re: "Is There a Force of Gravity?"

instead of the numbers they are intended for.
