Run my demo: <http://www.users.bigpond.com/hewn/gr-aether.exe>

It's quite safe.

Ah... it's quite safe.

Is it quite as safe as your diplomas are quite genuine?

Dirk Vdm

It illustrates, plainly and simply, the second postulate of SR and (warning) it may come as a shock when you realise what it implies.

In the demo, the light pulses all move at the same speed wrt the screen.

Please explain what causes them to move at the same speed.

Please provide a physical interpretation of what the computer screen might represent and why the pulses move across it at the particular speed they do ..
