| "If the behavior of nature isn't what it should be, according
| to our
| natural understanding of things, then something must be
| working
| incorrectly. If an explanation exists and correctly predicts the
| behavior, but it is not according to our natural
| understanding of
| things, then we have not found the correct explanation.
| Physics needs
| to reject all theories that violate our natural understanding
| of
| things, even if the theories work correctly, until we have
| found a
| theory that works and is consistent with our natural
| understanding of
| things. This is because our natural understanding of things
| is correct,
| always has been correct, and will always be correct. Plus,
| life would
| be easier that way, and we're the boss."

Did you snip something, hypocritical lying asshole?

Why no, I don't believe I did in my response to you. Did you? Ah, that
would be hypocritical and lying of you, wouldn't it?

Didn't I ask you not to remove me from your killfile?
