Yes, I kept trying to get dr.Jeckyll to understand itI already showed him the formula, to no avail (at least, so far).

You were simply misunderstanding the problem and so coming up with the wrong solution. It helps when you are actually talking about the same problem as everyone else (G, Harry, myself). As I said .. you were using the right formulas but misapplying it (as far as the problem the rest of us were talking about).
