xxein: You don't need a diploma to do the physic. All you need is a logic.

I know you'd like to think so. That is the hope of many an amateur on this group. It is unfortunately not true. It isn't true for plumbing, it isn't true for cardiac surgery, it isn't true for the practice of law, and it isn't true for physics. I haven't got the foggiest idea why you would think physics would be different.

xxein: So logic is not needed?

You have no idea what logic is, Geez you stupid shit.
