fat rats in big cars pretend understanding
by not understanding

what they actually want is that tvey want you
to understand that thay understand by not
understandin

than they want you by forcing you to also
pretend that you understand by dont
understanding

similarly, you cant create, destroy and transfer
faster than speed of light matter, energy or informTION

therefore consequently, accordin to thay,
info cannot be destroyed, whicha has enormous
implicTION in knowen physics and stuff, which
is complitly wrong, you need ta start from tha begining

Re: why relativists think that information can be destroyed?

and also accordingly, info from your broken brain
can never be destroyed, which remains stored
imaginary hyperspherically, but now without being
bounded by growth depth deficit [Hammond 2007],

so she grows now freely

A mind is a horrible thing to develop...alone.– Hide quoted text –

xxein: So? There is still only one physics. Can you find it without
going along with the herd?
