I don't know where you got that idea.

Why would they say standard temperature and pressure if it did not matter?

For the second, they *don't* say. Where did you get the impression they do?

Well, I remember that from the high school books I had when I was in school.

You'll have to point to where in high school books mention anything about the NIST standard for the SI second. I'm sure they mention STP in there somewhere, but it doesn't have anything to do with the SI second standard.

So you are saying that the
