"K' which relatively to system k is in a state of parallel translatory motion [...] such that its origin of co-ordinates moves with speed  $-v$  on the E-axis."

As it's indeed quite disastrous for your book >>

:-) As I repeatedly told you, since system K' played NO ROLE in the rest of his paper, and didn't even exist until there, it has zero affect on any of my book.

As I showed you, the intro to your book on Internet is disastrous.

<I'll give you the German here: >

I'll give you my off-the-cuff translation with it:

OK I follow you with the original above it:

"Wir Fuehren zu diesen Zwecke noch ein drittes Koordianten-system K' e
