[Mod. note: Followups set to poster. -ik]

Hi all,

In October 2003, members of this newsgroup were kind enough to fill a survey about learning and knowledge-sharing which I applied as part of my PhD. Several people freely gave their time and helpful comments. I posted a brief summary of the results two years ago. Now I'm happy to report I have defended my thesis, and recently presented a paper at the Academy of Management Meeting in Philadelphia.

I want to thank again all who participated. I don't work at a university yet, so I have set up a wiki page to hold my thesis and research papers. I promised participants full access to research results, so you're quite welcome to download them and read about your virtual community (named PHYSRES in the thesis).

With kind regards,

Enrique Murillo, Ph.D.
Mexico City
