Hey sci.physics.research,

I'm a undergrad physics major and think my latest paper linked below is the best thing since sliced bread.

<http://www.sendspace.com/pro/6a1u9b>

Please have a read; it's only 4 pages of text and 5 pages of FerroFluid pictures.

Michael

P.S. My skills are more on the experimental side, hoping one of you can say oh, that's just an picture of something something manifold. <smile>
