Hey World,

I'm a undergrad physics major and think my latest paper linked below is the best thing since sliced bread.

<http://www.sendspace.com/pro/6a1u9b>

Please have a read; it's only 4 pages of text and 5 pages of FerroFluid pictures.

I think the images look like some kind of gnomonic projection.

My skills are more on the experimental side, hoping one of you can say oh, that's just an something something manifold. <smile>

Here's a quick link to an example picture from the dataset. Name that 4d shape.

<http://www.sendspace.com/pro/dl/vb6qjh>

Michael
