No it just says god is ungrown brain – ir it says, god is a perfect man and humans aren't yet perfect etc etc ALL unsupported allegations. You have proved nothing.

<snip>

You are repeating the same drivel that doesn't answer my question.

I am an observer waiting to observe what remarkable feats you claim to be able to accomplish. You say that men generate reality. I'm asking for you to show that you can create matter to prove this point.

You just dodge the issue.

If physics is about observables let us see your evidence. Pointing out the window and showing us the world only proves that it there not how or why it came into being.

Oh, do you have a doppel-ganger ? You have no proof and are doing anything you can to avoid demonstrating an experiment.

Are you just going to sit there spouting words or can you shows us anything of any real substance ? You're all mouth and no trousers. Provide evidence !

Steve M
