Dear Mr. Maharaj !

Of course, what you are saying might at first sight look deplorable. But is a tradition rooted in American history that from time to time some kind of American which hunt has to be performed.

Besides The Witches of Salem or McCarthy's hunt of so called communists or people following "un - american activities" your example seems to be another kind of the dark side of a society who believes that some of their members are really endowed with the TRUE SPIRIT.

Whatever this may be - it is present and it seems to frighten you.

I regret that.

I can only recommend your people to start studying the history of your country. Perhaps then they will decide how to go on.

Besides that I am a bit astonished. Because in certain states of your country it is forbidden to teach about the evolution !

So intolerance has been alive for many years and your NAZIS have toe right to speak and publish freely !

Explain that to whom you may - you are just sitting on the top of an iceberg and that's it.
