Jimp de pimp finds the following TJ topics NUTZ and TJ should be looked up for making USA #1.

Xray Underwater laser.

Underwater red laser.

vacuum panel insulation

hydroelectrics

Liquid piston engines

GPS

Global antenna

automation robotics

deep sea cam oil ( corn oil ) so the cam can stand the pressure.

Gravity

light

the universe

money

forest

ships

global plotter global star

Global oil

apl

deep sea search for life

Ice breaker " Giant "

(((( clear steel and the cold block with mercury trapped inside.

solid superconductors ))))))))

10 of my 90 inventions above ..

I will still pay 10 million in cash for a 1/2 cup of anything that will

turn 2 gallons of oil into a solid so it can't leak from a sinking tanker

.so if its sinking we can make it a solid .

That's the new X prize.

AND what really bugs idiots like jimp is a billionaire posting on a

webtv from a ship with his own star going around earth .

No matter where the ship is the phone works.

Posting a million bucks bugs idiots that want it but are cowards.

They hate it when I post a million bucks and just anyone can call the

numbers and make it their million bucks.

rack of lamb ,,here it comes...: ))

My cooks piss them off too ..

Every trip I have new cooks from around the planet and pay them 60 grand

for the trip each.

Thats million bucks in some places .

I pay evrybody 60 grand a year below top deck. top pay on here is 1/2 mil a year.

We loaded # 2 ,,

IF YOU CAN'T DO THE MATH YOU JUST SIT ON THE BANK AND WATCH US SAIL AWAY

Its funnie ,,wile the gold came up from the deap amarica , I posted about it wile it was going on , 4 years latter you herd about it.

Ballard was finding the titanic ,,imploding cams ,, we were deaper than his cams would work . They knew where the titanic went down . No one knew where the americana went down. The search aria was the atlantic ! The shipping lane for that ship was 500 miles wide and anywhere between.

Finding 1 billion in gold on a side steamer that no on servived or knew where it sank by looking for it is imposible.

without an xray its imposible.

without a few inventions 17000 feet was imposible ,,

Its not like you could go buy JASON.

It had to be PIXY .

Now the privet sector is 20 years ahead of the planet. We
