<snip 300 lines of speculative physics with no practical application>

[Hammond]

A little bit of knowledge is dangerous, and that's what you have.

The danger is that you can't see the forrest for the trees.
You keep lecturing us in 300 line posts about the trees,
when everybody else is talking about the forrest.

Hammond has discovered, proven and published the fact that
the classical "person-God" of Religion exists and is explained
by CLASSICAL EINSTEINIAN GRAVITY.

Of course this means that when quantum gravity is discovered
we will get a quantum gravity explanation of God.

However, just like Newtonian Gravity will never become outdated,
the classical "person-God" will never be superceeded or outdated
by anything else, and is here to stay forever.

Therefore, your 300 line speculation on the explanation of the
"quantum gravity" basis of God is not only 100 years
premature, entirely speculative, but it is irrelevant in view of the fact

that an ACTUAL PROOF of the "classical person-god" has been discovered and is on the table before us.

I suggest, that as a Mensa member, you apply your intelligence to something practical, like defending Hammond.
