The Scientific Analysis Of JFK's Assassination

(FOIA allows public analysis of this film for millions of people on Internet)

- 1) Don't pay too much attention to Oswald.
- 2) Don't pay too much attention to the Secret Service Agent Driver.
- 3) Don't pay too much attention to the suspicion of forgers made the Zapruder film.
- 4) Don't pay too much attention to the surroundings.
and so on.

Look at the bullet entrance wound shown at the links which is at about 45 degrees pointing upward in front of JFK neck with the upper back part of JFK's head blown out. Notice his head fly backwards not forward during the gun shot. Notice that Jackie hugs him ((before)) the gun shot took place in the film. Notice how she lowers her hands, then JFK looks downward and starts to cover up the front of his neck and body. Notice she then puts her left hand on his back pulling him slightly forward, then appears to reach downward, then looks to see if Gov. Connally is looking, then look at what appears to be black fuzzy object in her left hand (with her white gloves on), then that left hand moves toward JFK's neck. She appears to be hugging him then lowers herself slightly and you can see her white glove next to JFK's neck, then you can see a blasting effect like a gun blast, then you can see her left hand slightly move back from the counter force of what appeared to be in her left hand. Then all the others looked surprized in the car except her. The Secret Service agents turn their heads back to see what happened. She then appears to drop whatever was in her hand (no finger prints – she had gloves on), then as the others are ducking in the car. She then crawls out of the car.

She never says a word for years, then marries billionaire Onasis. He threatens to divorce her, he then dies and she inherits a fortune. Later in about year 1993 she gets sick and dies.

Who killed JFK? You tell me. Was there a conspiracy? You tell me. Look at the film. All eyewitnesses of this (probably about 50 people), either died mysteriously, or are missing, or had bad accidents.
