Yes indeed, the post-election Google sucks donkey dicks!  
Anyone can plainly see that the embedded Google-archived links, message id's and email addys are totally **\*BROKEN\*** across-the-board on the Google "beta" Groups archives. I've specifically posted numerous links for comparison, e.g., to wit, precisely verbatim, anyone in the United States can compare these three links e.g., paying close attention to how the "beta" BREAKS ALL aforestated links and TRUNCATES any longer messages and FORCES all messages to appear in non-mono-spaced text, thereby further munging and obfuscating messages originally intended to be viewed in mono-spaced text, like charts, ascii art, text-justified paragraphs, etc. Thus **\*ANYONE\*** can see this for themselves:

<http://www.google.co.in./groups?selm=5d24b5eaa007da8b663168f90ea8a915@dizum.com>  
<http://www.google.co.uk./groups?selm=5d24b5eaa007da8b663168f90ea8a915@dizum.com>  
<http://groups.google.com/groups?selm=5d24b5eaa007da8b663168f90ea8a915@dizum.com>

And now with Google's "beta", PGP-clearsigned archived newsgroup messages can no longer be verified "good" AND neither can they be proven "bad", by contrast. Thereby, ANY archived message can now be either truly or falsely attributed to ANYONE without recourse—thus rendering the entire newsgroup archives useless and unverifiable.

Doubtless because knowledge is power, and the archives are replete with a great deal of knowledge posted from all over the free world, with messages dating back to 1981—some messages rumored to be post-dated from 1979. And because the liberals FEAR knowledge, that explains their post-election motivation for globally-censoring the archives, since knowledge exposes the nutjobs for what they really are: extremist LOSERS who hijacked the

sci.physics: Re: Having problems with This Google Groups Beta Thingie ;-)

Democrat party and \*LOST\* them the election in Spades!

Now moderate Democrats are jumping the sinking ship in droves, and our grand ol' Republican party just keeps getting BIGGER and STRONGER with each passing day. And there is a \*massive\* Judeo-Xian Revival igniting across the United States, even in the dwindling "blue" meaning high-crime Urban counties there is a rising interest in Christianity and Gospel music, even Gospel heavy metal and hip hop is finding its way onto the CD-store shelves in record numbers (pun, get it?). Every Christian knows that the liberal party is the Anti-Christ party, and we are making SURE that every \*REAL\* Christian in America will register and vote Republican across-the-board in EVERY future election from now until forever and ever.

And Yes in-deed and in-fact Google is \*CENSORING\* websites and on-line news media content in bias with the left-wing terrorists like their buddies on "60 Minutes", Al Jazeera, the Guardian, NY Times ad nauseam ever since their "beta" kicked in circa December 1st 2004. And that's UNDENIABLE! Just try <http://news.google.com> and look for FOXNEWS and other moderate-to-conservative on-line media sites. See? On rare occasion they show up, but it's nothing like it was prior to ~December 1, 2004 when the "beta" kicked in.

And it's just like that forged Texas Air National Guard Rathergate memo that the bloggers instantly recognized was an amateurish forgery done in Microsoft Word using TrueType's 12 pt. Times New Roman font. It didn't take long for the whole world to know about it thus now that pathological \*liar\* liberal Danny-boy Rathergate is out on his ear! Did they foolishly imagine that Google's new censorship campaign would magically go unnoticed by the Republican bloggers out there across America? Is \*that\* what they thought? The liberals really are inane losers, and now Google's medieval-style draconian censorship of the newsgroup archives ad nauseam PROVES that liberals are liars and obfuscators and disinformation shills of the first order! That's why Google's gone down the tubes...

**\*BOYCOTT\* GOOGLE!**
