God dont need a universe but made us this one.

Two universes could not be the same size.

The energy inside the universe is FIXED .

In our universe there is the conservation of energy. No energy made or destroyed.

But energy exist and broke boath rules in order to exist.

ALL the energy that ever existed still exist.

There is no new energy.

all energy is converted .

Where the energy the universe is made of came from is so large the universe was a small investment.

God is outside the universe that sits on his hand on sunday wile his resting active force makes a division in space and time.

Befor anything can be built it must be thought of.

conservation is perfect.

Mans preception of God is limited to the inside of the universe.

But God is outside looking in.

With a knowing start , a world we holographic life forms record on evry carbon atom.

All we know will fall into a black hole .

There it will change states .

all things and all times .

A new world where the streets are made of gold and clear as glass.

gold will be clear as glass as it falls into the black hole.

evry carbon atom your dna copied all your brain recorded on that you lost today will awaken ,,it is just off for 4 billion years and timeless ,,as 4 billion years was an instant that carbon atom left after dna is gone will be in the black hole .

When you die ,, 4 billion years passes in 1 second.

You are your own wittness.

Put it in your hand and work it with all your might. The world you biuld you me and God will live in and own all.

All things that were ever seen at any time .

Like the day jesus died and walked again.

That day we will all see.

And te day in 4630 , we will see that day .

100,000 BC to 100,000 AD .

200,000 years of knowing God.

sci.physics: Re: One world or many?

200,000 years to explore the earth .

God wount have a bike and Ill be dead till me and god can boath ride my bike.

A toy plastic ship drifted to shore in 1956 ad I found it on the beach

Its like new ! a kid would sit on it and role on the tiny wheels on its hull.

40 inches long .

made in japan 1956.

stainless pins „bakelight wheels .

a distroyer.

A new england sail boat transom.

around 1920

wow „I think they found a wrreck „a sailboat on a deserted island.

Looks like a 1920 sailboat grounded here in 1956 .
