non-sense, non-sense, non-sense. why don't you just say qi can't be tested.

i think when you say "non-skeptic" as opposed to skeptic, you are really trying to say "gullible fools who are deluded enough to simply believe that something which another person says is true is indeed true"... why all this sensitivity to "skepticism". stupid. just say you are making everything up.

many people claim things which they make up. well if they can temporarily "disable" their psi, then i am a member of the White Adept.

you are pathetic Q-on. you waste everybody's time on nothing. you did not deliver anything. moron.
