52 ice ages dug the grand canon.

Grass is 500 million years old.

the worlds first city was built 14000 years ago in south america.

man went around the world on floating ice.

man got to bora bora 12000 years ago on ice sheets foating in the sea.

from chile the ice ran ashore and a town was built on it and it sailed away to bora bora and they got off.

a big 1 mile thick pice of ice will hit shore 100 times.

you clowns dont know how to conduct any sci, your gov money baggers wanting rearsch money.

in 7 years you wount say shit about warm.

10 below at night in florida.

maybe for 2000 year maybe the bands wount flip.

maybe they will flip and flip back in 10 years.

maybe the earth will flip poles.

were gona find out together.

soon
