He was relatively among the better ones. Much less "gilded"  
so to speak.

Yes it sucks bad. I don't know what you're talking about on  
"Mid-Eastern repressive Islamic" countries, but the  
situation as far as news is concerned is healthy in Iran,  
and Arabs have historically been very true to their words  
and the safekeeping of others'. Best historiographers. They  
have a certain respect for truth that comes naturally in  
them, and this is hard to find elsewhere.

There are a number of outstanding publications by Pakistanis also. Really the state of the art news. In Iran, although different factions stay silent on different matters, overall the coverage is comprehensive. Nobody lies in there. There is a bit exaggeration or downplaying of reports, but nothing like straight lies like you see in the American press. American news service stinks from its depths all the way to its surface. You even budget the "necessity" to lie and pass such bills in your Congress. News service in USA is just a tool of some retard Capones who think that just because they're dealing with large amounts of money therefore they're somebody. They even own the bandwidths. Like somebody telling you, "In case you don't know, I own the air you're breathing, go check it out." Well fuck the bastard who denies me of EM \_frequency ranges\_ in nature.

I know the Jews. Jews of everywhere. In all the countries that they've formed lasting communities, result has been similar. I noticed it over and over and I thought I was being prejudicial and were going too far and had gotten busy censoring myself. Then I read the book "Diaspora" and found out everything I had observed was true and actually expressed in their own words. Except for the fact that they were of course oblivious to the problem they carried within themselves.

Not that it's all negative, they're the next to last resort when all hell breaks loose. There can come times that you can either get yourself ready for a fatalistic response to your problems, or still continue positively with a bit of real hope using the Jews! They're there all right. Always prone to manipulations of any kind. They can save a country or ruin it depending on what you do with them. And combined with a totalitarian government they can ruin lives in millions (they almost caused a Mongols-style catastrophe for the world via Hitler, if Hitler had been smart enough to use them for himself instead of throwing them out). Give the Jews, the essentially nationless people, the controls, everything, and you'll go down as a nation (Iran in 1925-1979 period, France of post WWII and the resulting slaughter of Algerian Moslems and losing Algeria forever as an ally, Argentina and what the Jews brought out of them, etc and etc, and now the USA).

In the case of Argentina, they drove their own countrymen to bomb their asses! Do you know what it takes for a friendly and fair people to get to \_bombing\_ their Jewish community? These suckers, every one of them worked for Israel in the background against the country of their births, including their fourth and fifth generation Jews. When Argentina received the still secret Exocet missiles from France under

very favorable conditions as long as the design would stay secret, these traitors stole one and shipped it to Israel to dismantle and study! Result was that the price went fifty times higher and a number of other businesses with France were also badly affected. The Argentinians this time had men go bomb their Jewish community buildings into rubble while congregations were going on.... And of course both Israelis \_and\_ Argentinians proceeded to add the final touch of declaring IRAN responsible for it! Qadafi would bomb American airliners and the Jews of every fucking country would declare Iran responsible for it. Well, we Iranians in turn have and again will use the Jews for our purposes too. Nothing easier than making some two-dimensional minds feel gggreat while having them do exactly what \_we\_ want. Check out the AIPAC.

Running a country is not as simple as building a "career" honey. You've never done that, even since 1948. You don't even know where to go to get what you need. You don't even know what it is that you need. So work for us for now till you mature.
