Take it one step further -- since we didn't "know" God's existence until Hammond proved it with his SPOG, God *didn't* exist until George came up with it... which makes God, what, about 3 years old?

Honestly, George, what happened to you since you earned your Master's degree -- with the kind of logic you exhibit these days, it's getting hard to believe you graduated from high school, much less college -- are you off your meds, or what?
