:They did. In the final report. Nothing.

You should read something before you start making claims about what is in it.

"...a small number of old, abandoned chemical munitions have been discovered...."

You're lying when you claim the report says nothing was found.

:Main point is that even the U.S. final report admits that their were no
:stockpiles or capabilities, only a risk of 'someday' which is meaningless as

Again, you should read things before making claims as to what they
say. From the same report:

"A former nerve agent expert indicated that Iraq retained the
capability to produce nerve agent in significant quantities within two
years, given the import of required phosphorous precursors."

You're lying again....
