Although GTR is a Tower of Babel  
that generates more heat than light,

and wastes time, money and minds  
on such things as time travel, worm holes,  
warped space, gravity waves,  
dragging space around, etc.

I still don't think that Sam should assert  
that Einstein's brain "was so wasted."

He did do other things you know.

A mind is a terrible thing to waste.

And as can be seen from Sam Wormley's posts,  
a wasted mind is a terrible thing.
