What is the limit?

- > We cannot fall at the speed of light.

Prove it.

- > This means time never ends.

Prove it.

Also, prove that time never ends but space does.

- > No infinite space-time curvature singularity.

Prove it?

- > No infinite physical quantities of any kind.

Prove it. What do you class time as?

- >

What about it?

- > What about that jackass?

>

Stop talking to yourself.

.
