No link to it. May have to scan the book.

Anyway. Mark. Maybe you can assist me with something.

Do you have any idea how the teslar circuit is constructed in the teslar watch??

We qi healers can determine that there is a blue aura surrounding the watch. When a person wears it. We notice that it balances the solar plexus chakra by making it normal rather than activated and this calms the person so much. Also it puts one in relaxing mode.

How does it do it? Beats me. I've been figuring it out for a month. I don't know if is the the 7.8Hz scalar frequency that can do it and whether the blue aura is related to the cancelling of the magnetic and electric field that can allegedly produced scalar wave.

Could qi be related to scalar wave. What actually happens if you cancel magnetic and electric field, why is subtle energy produced??

I've been studying maxwell equations and running into problem with the hard mathematics.

Maybe you can assist here. If we can analyze the constructions of the teslar watch and how exactly they cancel the magnetic and electric field artificially produced using an IC. Then we will have the clue to the relationship between electromagnetism and subtle energy.

## Re: New Atomic Model Acid Tests

Initially I thought of keeping this to myself but I run into walls trying to understand why.

Check this out and the Teslar watch FAQ for circuit clues. Since you are a wiz, maybe you can gain some insight into how the circuit is built.

<http://www.teslar.com/research.html>

(click on Critique and Hard Science for the debate between skeptics and the researchers)

Don't reply and tell me it's all bullshit. I have seen the effect. Bring any teslar watch to any pranic healing center and bring a normal one too and test them. They will detect blue aura in the teslar watch and noticing their solar plexus chakra normalizing and they can experience very great calming effect much like being in meditation mode.

I don't know why It does that and can't explain it to you. I wanna figure out the why and physics of the interactions.

The manufacturer of it, Ilonka Harezi, a multi millionaire, brought together many physicists in the 1980's to build the teslar watch. They used clairvoyants as monitors too. I wanna build one from scratch. This would give me a clue of the relationship between electromagnetism and subtle energy and finally nail the physics of qi.
