Maybe it is because these greens get older, they get wiser.

Of cause Bush's agents work on them full time too.

Anyways, I like it, I want nuclear power.

For example in Germany, they are closing all nuclear power plants.

Now there is a way to throw away money, Germany IMPORTS oil and natural gas.

These things are just going to sit there, for decades, until radiation is low enough to rip them apart.

Politics... And, anyways, the Germans will WANT reactors, so they have plutonium to bomb the white house, so US will support the greens there.

Logic....

Armament.. sales, US needs everybody to be dangerous and armed to the teeth.

Have Russia fall apart, rebels there grab nuke silo, those (muslims?) launch at US, US retaliates, WW3, firecrackers everywhere, nuclear power is safe now, radiation leakage from the power plants has lower level then that left from the nukes.

Simplicity....

Solution.. move to mars (for the time being).

.... beep beep beep.... 2090 after 80 years researchers finally manage to create a working transistor again.

Sorry, spelling going to buy new keyboard tomorrow...

hehe

LOL
