University of backali LWB

After the failure of the EOTVOS experiment by Dr. Al Uncle to detect any difference between falling left and right hands, I Dr. Al .E. Cat have created a new 3xperiment, based on the belief that Quark coloring makes its way in to human skin.

And because there clearly is no connection, we need to test this by putting a white and black person in space and let these travel along a geodesic.

Al. E. Cat predicts a 1 in 10E18 difference based on the math as shown in <http://mathforum.org/library/drmath/view/54685.html>
We expect the first results by July first, and Einsteins sweat will drawn you all.
