How would you know what sense they had, unless you're claiming to have a superior perspective to them (and therefore everyone else)?

More to the point: what qualifies YOU to judge their (or anyone's sense)?

And since when is physics NOT a mathematical science? If you have a problem with calculus being inherent in the science, then take it up with the One who made the world as it is, and let's see how far you get with He/She/It.

.
